

Regional businesses have responded to our

Medilink Midlands

‘Here to Help – Our Big Ask’

pledging to ‘do their bit’

during the COVID-19 pandemic

Issue #2

Join the ‘Big Ask’ – Here to Help

Have you joined the ‘Big Ask’ – if not why don’t you join? If your company is not listed and you have something that could assist or help with the COVID-19 situation, then join ‘Our Big Ask’ and enter information on your company’s product, service or manufacturing capability.

Click here to enter your details > [‘The Big Ask’](#)

Can Medilink– Find it / Source it? - Big Ask #2

During the current pandemic we have been made aware of critical shortages other than that of personal protective equipment (PPE) – such as Raw Materials, Goods, Skills & Services. This could be due to demand, supply chain failure or self-isolation.

Let Medilink try to assist and source your request by utilising our extensive member and business networks. The information you provide will also be fed into local and national government organisations so that they too can be informed of the critical shortages that exist in the UK in terms of materials and items other than PPE.

This service is free of charge. All Medilink asks is that if we are able to find you a source of material etc. that you let us know if our assistance has played a part in successfully resolving your requirement/s.

***NB:** A West Midlands company recently got in touch and we spoke about a COVID-19 related sourcing issue that they had. Medilink were able to search our database to identify and introduce them to a local supplier. After speaking directly to the owner of the local supplier the introduction was made within the hour! Why not let us see if we can do the same for you ... we may not always be successful but we will do everything we can trying.*

In association with

'Big Ask' – Here to Help

Richard Stone
Director Medilink Midlands

These are unprecedented times and the combined resources of the Medilink's of East and West Midlands are working with numerous agencies to try to help companies connect; to locate products and services and to signpost those organisations rapidly developing products.

We are seeing multiple requests, business opportunities, offers of help and new solutions and ideas and we are trying to support every one of them, trying our very best to provide a robust process to properly collate them and get them to the right people and agencies without undue delay.

Issues like the one we are currently experiencing create urgency and significantly magnify the need for organisations across the sector to collaborate and work together. As membership-based representative bodies providing specialist support to help boost economic output by overcoming barriers to growth, Medilink's have comprehensive industry knowledge and networks across the medical technologies and life sciences sectors; skills we are utilising to the full during this crisis.

We fully recognise that your businesses are likely to be under multiple pressures currently and we are truly thankful to every one of you who is engaging with this Big Ask initiative. We hope your efforts and hard work are rewarded and recognised during these times of need and we promise to do everything we can to assist you.

Key Covid-19 Asks

PPE	Product	expara Limited	PPE including masks , aprons/gowns - reusable and single use .
		Enterprise Europe Network	Medical grade face masks
		GIPskins PPE	GIPskins PPE Grip Infection Protection Sleeves- Reusable as cleanable between patients (as skin) disinfectant friendly, bite, scratch, tear resistant, latex free & waterproof + non threatening in appearance design for Carers working with Dementia & Mental

Email	lisa.taylor@simple.uk.net		
Tel.	07500 969717		
Postcode	ST10 2EQ	Our Business is :	
Region	West Midlands	NHS's self management tool 'Florence' with expert coaching and guidance	
Our offer:	During the current outbreak of COVID-19, adherence to official national guidance is a primary determinant of the effectiveness of any precautionary steps that members of the public take. There is currently a wealth of advice from health authorities and Governments around self-isolation, social distancing and other preventative measures. It is imperative that members of the public adhere to this advice to reduce the likelihood of further transmission of the COVID-19 virus. However, people may be overwhelmed with the deluge of official information and updates, and confused by misinformation spread via word of mouth and social media. This is a particular problem for vulnerable groups and serves to exacerbate anxiety.		
	While concerns about COVID-19 are raised globally, for at risk groups (e.g. the elderly and those with pre-existing conditions such as respiratory or heart diseases), the outbreak is even more concerning as the consequences of contracting the virus are more severe.		
	Within our business as usual model we are working collaboratively with our Healthcare Provider Community to develop instantly deployable COVID-19 specific pathways for Florence with techniques drawn from the broad independent evidence-base already underpinning Florence.		
	Leveraging evidence based best practice gained over many years, Florence can be used right now to help patients with protocols designed to reinforce official national guidance, re-assure patients, reduce the effect of social isolation in vulnerable groups and to direct people away from calling NHS 111 & GPs, but encourage the appropriate use of NHS services at the right time. Florence is also being used to support patients to stay well by optimising their condition management at home and create an opportunity for health care providers to remotely manage their patients.		
Certification:	Mediaburst Ltd (www.getflorenc.co.uk) are Florence's technical provider and hold all certification required by NHS Organisations including ISO 27001		

TCC-CASEMIX Limited			
Web	www.conclude.org.uk	Product / Service Name	My Business provides: Product / s, Services, Technologies

Monitoring - Patients Remotely

Amplitude Clinical Outcomes			
Web	www.amplitude-clinical.com	Product / Service Name	My Business provides:
Email	info@amplitude-clinical.com	Amplitude pro enterprise platform will allow clinical teams to remotely monitor a range of patients including those suffering from chronic diseases, conditions and mental health disorders, safely and effectively to ensure a continuity of their care during	Product / s, Services, Technologies
Tel.	0333 014 6363		
Postcode	WR9 8QT	Our Business is :	
Region	West Midlands	Designer / Developer - Products or Software	
Our offer:	<p>Amplitude works exclusively in healthcare (NHS and private) for digital capturing of patient reported outcome data and quality of life and well-being assessments. The data gathered can be used to proactively manage virtual clinics, prioritising those patients most in need and ensuring patients are continually monitored remotely.</p> <p>Amplitude's platform specialises in the capturing and monitoring of patient reported outcomes as well as clinical data, that puts patients into correct clinical context (including case mix adjustment factors), allowing the effective monitoring of patient progress in real-time, for the treatment of mental health conditions, chronic illnesses and diseases, as well as post elective / emergency / trauma surgery and care.</p> <p>The system provides automated email and text messages to patients to request they respond to the specified questionnaires and scores. This allows mass collection of data from patients with real-time views of consolidated and individual responses with little to no administrative input.</p> <p>We use a combination of questionnaires and datasets, nationally and internationally recognised assessments and scores specific to health conditions and customised to the requirements of each client, including bespoke questionnaires when needed. Our customers include around 20 NHS Trusts, 12 private hospital groups and clinics and 15 clinical registries. We run international registries and provide our platform to one of the largest private hospital groups in South Africa, who use the system extensively for care pathway management. Our platforms are used by hundreds of clinicians and have millions of patient assessments and questionnaires completed, that are used by hospitals and clinicians to monitor patient progress in near real-time.</p>		
Certification:	Amplitude takes the security of the data it processes, on behalf of our customers, extremely seriously. As such, we have deployed the highest levels of security features in our software. This link will take you to the data security certificates. https://a		

Monitoring - Patients Remotely

HAS Technology Ltd			
Web	www.armedprevention.co.uk	Product / Service Name	My Business provides:
Email	armedprevention@hastec.ltd		
Tel.	0121 308 3010	Falls Prevention solution using AI	Services, Technologies
Postcode	WS13 6TJ	Our Business is :	
Region	West Midlands	Designer / Developer - Products or Software	
Our offer:	Self-isolation for older individuals, particularly if there are existing multi-morbidity conditions, could lead to physical deconditioning (muscle mass reduction) and degeneration. Now more than ever we cannot afford unscheduled hospital admissions so we believe our technology can help you identify those most at risk through remote data collection, analysis and AI. Features: <ul style="list-style-type: none">• Warning flags raised approximately 32 days in advance of a potential incident, allowing for early intervention and appropriate support.• ARMED combines pioneering predictive analytics modelling with innovative wearable technology, and health and social care data, providing a powerful tool to identify risks (including risk of falling), earlier in the care cycle.• Empowers people to remain independent in their home for longer.• Data is 24/7 by a wearable device worn by the individual.• ARMED has been used in a variety of community settings and helped identify risks earlier in the care cycle, enabling prevention and early intervention whilst at the same time supporting self-management.• Assists vulnerable citizens safe and well, during staff shortages• We offer ‘ARMED in a box’ with 3 months use of the platform free of charge (some investment in hardware required).• ARMED allows comprehensive reporting on a variety of metrics. It identifies gradual deterioration.• Hosted on Microsoft’s Azure Platform providing high levels of security to maintain confidentiality, integrity and availability of customer data.		
Certification:	ISOlogy’s security practices Compliant with Public Services Network (PSN) standard by independent CLAS consultancy, Advent IM. HAS Technology also maintain both ISO27001:2013 Information Security and ISO22301:2012 Business Continuity Management Systems. Both our Information Security Management System (ISMS) and Business Continuity Management System are comprised of multiple policies, which have been designed to protect all aspects of the system, including customer data. HAS Technology have also implemented a Personal Information Management System (PIMS) in line with the requirements of the BS10012:2017 Data Protection standard, the principles of which are the overall protection of data, maintenance and improvement of those systems protecting data, and improving our compliance to good data protection practices. <i>NB: No indication of HCSN / N3 requirements / NHSX / Info Gov compliance.</i>

Email	info@hips-protect.com		Fall-Safe Assist – Hip protection with sensor to detect all falls and call emergency services	Product / s
Tel.	01264 737437			
Postcode	SP11 0LE	Our Business is :		
Region	South East & London	Designer / Developer - Products or Software		
Our offer:	We provide complete hip protection for elderly fallers especially those with osteoporosis, and an embedded sensor will detect all falls and summon emergency services, enabling people to live safely at home. For hospitals and care homes the system monitors the patients/residents, ensures they are wearing the hip protector pads and summons help after a fall, as well as collecting all relevant data on the fall in a cloud database for subsequent analysis			
Certification:	ISO 9001:205

Redgear Solutions Ltd			
Web	https://www.redgearsolutions.com/	Product / Service Name	My Business provides:
Email	info@redgearsolutions.com	Redgear Remote Monitoring Solution	Product / s, Services, Technologies
Tel.	7585452593		
Postcode	EC1V 2NX	Our Business is :	
Region	West Midlands	Designer / Developer - Products or Software	
Our offer:	<p>Redgear Solutions offers a remote monitoring solution that gives an insight into the environment surrounding an individual. The solutions monitors; Movement, Sound, Light Levels, Temperature, Humidity, Co2, VOC, Atmospheric Pressure and device orientation and battery status. This allows us to gain a detailed understanding of a persons routine, and how they are affected by the environment around them.</p> <p>The solution has been used with a large provider of independent living villages to aid understanding of their residents living with dementia, and how the condition effects each individual - allowing carers to make evidence-based decisions and test the success of interventions.</p> <p>The solution is designed to give a greater level of detail to the work carried out by carers and can be used entirely remotely, with reports and alerts tailored for each use case. The solution lends itself to tackling the resulting isolation of the COVID-19 outbreak and enables carers to provide a person-centered level of care without actually being physically present, which engages residents whilst minimising risk of infection. The solution has so far been used to look at issues surrounding: sleep patterns, nutritional intake, nighttime disturbances, bathroom usage (and links to UTIs), behaviour and reactions, temperature and thermal comfort, air quality, monitoring injury recovery, matching perceptions of residents with reality and much more.</p>		
Certification:	No certification held.		

Sanandco Limited			
Web	www.sanandco.com	Product / Service Name	My Business provides:
